QUASAR

H O L L A N D

DOCCIA 4-kant wall-lamp
design: Jos Muller

GB

Instructions:

- Switch off electricity during mounting.
- Drill the holes in the wall.
- Connect 220V/230V wiring and grounding-wire. 12V is already mounted.
- Fix the lamp with the received screws.
- Carefully assemble the cover plate in the connection slots.

- Carefully unpack the glasspiles and fix them to the cap . By pushing the aluminium-pin vertically through the hole it will block horizontally when you rest it on top of the cap.
- The composition is ones own choice!

- For replacing the lightbulb lift up the coverplate which protects the bulb and carefully take the bulb out of its socket.

Productinformation:

Clean the stainless steel with an acknowledged cleanser and soft towel **ONLY WHEN THE LIGHT IS SWITCHED OFF.**

Lichtsources:

With this socket you will receive a 1x G6,35 / 50W / 12V HALOGEN (2x G6.35 / 50W / 12V HALOGEN with the double Doccia)
